Education

[Institution and department] **[Start – Present]**
[Master's degree, in progress] in [Field of study]

- **Advisor:** [Advisor's name] **Research area:** [Topic].
- **Expected graduation:** [Month, Year; retain only if applicable]; **Coursework:** [Relevant courses or research training].

[Institution and department] **[Start – End]**
[Bachelor's degree] in [Field of study]

- **GPA:** [Score / scale] **Coursework:** [Selected courses relevant to the application].
- **University honors:** [Honor, awarding body, and date; list under the relevant institution].
- **Competitions:** [Competition, award level, and year].
  [Another competition, award level, and year; keep each award on a separate line].

Research Outputs

I. Publications

[1] [Preceding authors], **[Your Name]**, et al. [Paper title]. *[Official journal or conference name]*, [Year]. [Volume, pages, DOI, or acceptance information, as applicable].

[2] [Preceding authors], **[Your Name]**, et al. [Preprint title]. *[Preprint platform]*, [Year]. [Identifier or stable URL; distinguish from peer-reviewed acceptance].

[3] **[Paper or ongoing research title] ([Author position], [Actual submission status]).**

[Research question and method; your own work; results already obtained and evaluation conditions. Expand to two or three lines where useful.]

II. Patents

[Patent title] ([Inventor position]) **[Research dates]**

- **Patent information:** [Filing or grant status, identifier, and corresponding date, based on the official record].
- **Technical work and contribution:** [Problem addressed, core method, and the technical work you performed].

III. Books and Chapters

- [Authors, title, publisher, year, and actual publication status]; contributed [Chapter or specific work].

Internship Experience

[Organization name] [Department / Team / Position] **[Start – Present]**

- **Research tasks and methods:** [Specific research problem, methods, and your own responsibilities].
- **Implementation and evaluation:** [System, experiments, or analysis you completed, with key design choices and evaluation methods].
- **Project outcomes:** [State verifiable deliverables or findings; define the basis and comparison conditions of numerical claims].

Skills

- **Tools and techniques:** [Tools or techniques]; able to complete [Specific development, analysis, or research tasks relevant to the application].
- **Research methods:** [Methods] applied to [Actual research problems]; experience in [Study design, implementation, or analysis].
- **Languages:** [Test, score, and year]; [Other language evidence or proficiency supported by your record].
